

**CONWAY REGIONAL HEALTH SYSTEM
CLINICAL LABORATORY**

Paternity Testing Information and Collection Services

Collections for paternity testing are available at the Conway Regional Clinical Laboratory. Collections must be scheduled in advance and typically take up to one hour to complete.

Primary arrangement for testing is via agreement with DNA Diagnostics. The patient is instructed to contact DNA Diagnostics. DNA Diagnostics performs preliminary screenings, then will contact Conway Regional Clinical Lab to arrange for collection of samples. Alternate companies are options for testing, however, the patient is responsible for arrangements with the company.

Payment for collection services is due at the time of collection. For current pricing, call the Conway Regional Clinical Lab at 513-5752.

Specimens are collected Monday through Wednesday between the hours of 9AM and 3PM. If possible, simultaneous collection of specimens from the mother, child(ren), and the alleged father is preferred. All parties must be identified by one of the following documents:

1. picture identification documents or birth certificates
2. signatures
3. fingerprints
4. witnesses
5. on site photographs at the time of draw

After collection, all samples are sealed and submitted to the testing facility. A chain of custody document accompanies all samples. Results are returned to the patient via the coordinating facility (DNA Diagnostics).

Contact phone numbers for testing services:

DNA Diagnostics 1-800-833-3070

Paternity Testing Corp 1-888-837-8323
